

AI, RISK AND LEADERSHIP: A PRACTICAL GUIDE

ACP Consulting Group

A leadership workshop for confident, responsible AI adoption, and smarter ways of working in 2026

AI IS ALREADY IN YOUR ORGANISATION.

The question is whether it's being led, or left unmanaged. This workshop supports leaders to understand AI, manage risk, and identify where AI can safely create value, so organisations can do more with less, with confidence.

WHAT YOU'LL LEARN

By the end of the workshop, leaders will be able to

- ✓ Understand what AI is and is not in a business context
- ✓ Learn what's new in AI in 2026, and what actually matters for leaders
- ✓ Identify where AI can safely create value
- ✓ Recognise key AI risks (IP, privacy, reputation) and how to manage them
- ✓ Clarify their organisation's AI starting point
- ✓ Lead AI adoption without fear, hype, or paralysis

WHO IT'S FOR

For Boards, Executive Teams and senior leaders in organisations:

- ✓ Where AI is already being used, but not yet governed
- ✓ Operating in government, mining, energy, agriculture, construction, or social impact
- ✓ With 20–2,000 employees
- ✓ Seeking a practical, leadership-led approach to AI adoption

LEARNING EXPERIENCE

A half-day or full-day interactive workshop blending:

- ✓ AI integration expertise
- ✓ Leadership psychology and change management
- ✓ Governance and risk insight

Tailored to your organisation and delivered in-person or virtually.

WHO DELIVERS IT

ACP Consulting Group

Leadership, psychological safety and change specialists

Lee Goldsworthy

AI engineering and risk management expert working with complex organisations

Madelaine Fisher
